A message to parents and guardians

The Colorado Department of Revenue's Division of Motor Vehicles is pleased to continue as a full partner with multiple state agencies*, the Colorado Young Driving Alliance and Safe Roads Alliance and State Farm®, Toyota and the National Guard in offering Colorado's parents and guardians *The Parent's Supervised Driving Program* guide.

Since 2013, we have received overwhelmingly positive feedback from parents and guardians who have used this guide to assist their teens in developing the habits and skills necessary to be safe and responsible drivers. I hope you find the same thing true for you.

Safe roads begin with safe drivers. The Division of Motor Vehicles is committed to ensuring all individuals seeking a driving privilege have satisfactorily met the standards for the issuance of a permit or driver license. The 2018 Colorado Department of Transportation Problem Identification Report highlights that inexperience was the leading contributing factor in injury/fatal crashes among young drivers (15-20), but also that Graduated Driver Licensing (GDL) laws work as the number of drivers aged 15-20 involved in a fatal motor vehicle crash decreased by 12 percent from 2015 to 2016.

To help ensure our young drivers are getting the experience they need to be safe and prepared, we actively partner with the Colorado Young Driving Alliance, an organization dedicated to educating students, parents and guardians about the GDL law, which is designed to ensure that our most at-risk drivers are given the right level of training before being given unrestricted driving privileges. It is important that parents and guardians have access to the right resources and education about the GDL law and its requirements.

Parents and guardians are essential to the success of the GDL law and, ultimately, in training teen drivers. Two important resources include this guide and its companion smartphone application (available in both IOS and Android formats) and an online parent course. Both have been developed as resources to successfully navigate through the GDL law and help ensure teens obtain the training essential to become a good driver. The guide and smartphone application can also be found online at the DMV website at www.Colorado.gov/DMV/Minor-Permit. The online course can be found at www.COTeenDriver.com.

Along with our partners, we are working to ensure that young drivers are taught the dangers of distracted driving, the effects of drinking and drugs on driving, the importance of having all passengers buckle up and how to share the road with motorcycles, pedestrians, and large commercial vehicles. Colorado's highest rates of teen driving fatalities are in our rural counties. Driver education, including behind the wheel training, provides our young people with essential opportunities to learn and understand the rules of the road and the laws that impact their driving privileges.

The risk of motor vehicle crashes is higher among 16-19-year-olds than among any other age group. In fact, per mile driven, teen drivers ages 16 to 19 are nearly three times more likely than drivers aged 20 and older to be in a fatal crash, according to the CDC and the Insurance Institute for Highway Safety (IIHS). The most important ingredient in a teen becoming a safe driver is the positive influence of a parent or guardian. Colorado Young Driving Alliance has reported that teens who say their parents set rules and monitor their driving behavior in a supportive way are 50 percent less likely to crash and 70 percent less likely to drive intoxicated. The old saying "practice makes perfect" is applicable to driving. The more time spent with your teen on the road, the more safe and confident they will be.

You can make a difference. I hope you find this guide and supporting online program a valuable resource to help in preparing your teen to become the driver you want them to be.

Sponsor message

A driver's license is a huge milestone in your teen's life, and one to be celebrated. As a parent, it can also leave you feeling concerned about your child's safety. State Farm® chose to be a part of *The Parent's Supervised Driving Program* to help parents guide a new generation of drivers to become safer, confident and more experienced every time they're behind the wheel.

State Farm understands that motor vehicle injuries are one of our country's most important public health problems. In fact, car crashes are the #1 killer of teens, and the first few months of unsupervised driving are the most dangerous. As the nation's leading auto insurer, State Farm has been an integral part of landmark teen driver research to help us and others understand how so many of these car crashes can be avoided. We've also learned new drivers need and want parental involvement. By providing teens with significant practice on a variety of driving skills and conditions, parents can make a huge impact in keeping the roads safer for everyone.

Through continued research and funding, State Farm is committed to preventing injuries and saving lives. We also work with national and local organizations to bring ongoing attention to auto safety issues and legislation. Across the U.S., more than 18,000 State Farm agents are making a difference too, by increasing awareness around safe driving and the impact new drivers have on the roads.

We encourage you to read this program guide and know that you will make a difference in your teen's safety, wherever the road takes them. Together, we can make this milestone a real celebration for your child and you.

MONEY FOR COLLEGE

Guard offers many programs to assist with your education and job skills.

- Monthly drill paycheck + full-time benefits for part-time service
- Student Loan Repayment Program
- Federal Tuition Assistance Program
- GI Bill Program to assist with the cost of going to school
- Academic Counseling, Testing, and Licensure Programs
- Specialized training in over 200 career fields
- Colorado State Tuition Assistance, up to 100% tuition paid!

SERVICE

One person can make a difference in the defense of our country and communities.

GET AN EDGE ON THE JOB MARKET

Your transformation from civilian Soldier takes place alongside other young men and women who are taking control of their future.

ADVENTURE & TRAINING

Do you need more excitement in your life? The National Guard strives to assists its Soldiers in living up to their fullest potential by providing educational programs and advance training, which will provide you opportunities to grow and mature, especially when it comes to your career.

NATIONAL GUARD

Sponsor message

For your teen, a driver's license represents maturity and independence. As parents, we understand it means so much more. That is why the Colorado National Guard is a proud sponsor of *The Parent's Supervised Driving Program*.

Like your new driver, the National Guard has long cherished freedom and independence. As the oldest branch of the military, we trace our lineage to 1636 when colonial citizens organized to protect families and towns from hostile attacks. Since 1860, the Colorado National Guard has served both community and country, responding to domestic emergencies, reconstruction missions, and overseas combat missions.

As you continue to steer your young adult towards greater responsibility and obligations, service in the National Guard can provide an additional support structure for their expanding life. By committing to part-time service, they can earn full-time benefits including monthly drill pay, health and life insurance, tuition assistance, and a retirement pension.

The Colorado National Guard is proud to stand with you and your teen as you begin training responsible and safe drivers. As you work though this booklet, we challenge you to devote maximum effort and accomplish each task to the best of your ability. Thank you for doing your part to make Colorado roads a little bit safer.

SAFETY JUST COMES NATURALLY.

Toyota Safety Sense^{™1} is now standard on many new Toyotas.

Now that active safety features like a Pre-Collision System (PCS),² Lane Departure Alert (LDA)³ and others come standard on many new Toyotas – including the all-new Camry – you get extra peace of mind at no extra charge. Toyota Safety Sense™ (TSS). Designed for safety.

Sponsor message

At Toyota, we have a vision of saving lives and amplifying the message of safe driving to teens, parents and educators. That is why we have partnered with *The Parent's Supervised Driving Program* to promote safe driving for your teen and family. At the completion of this learning guide, we hope you and your teen will have a much greater understanding of what it takes to be safe when you get behind the wheel of a motor vehicle.

We all know that driving poses certain risks. For teenagers, however, statistics reveal that the risk of being in a crash is greatest within the first 24 months of driving – higher than any other point in their lives.

As parents, you are the most important influence on your teen driver. By following the information in this guide, you will help teach them about the vehicles we drive, the roads we use, and the serious responsibility of being a driver.

And, while Toyota continues to design and manufacture leading-edge technology to help keep our customers safe, we fully understand that the best safety device in any car is the hands of the driver. That's you and your teen. So be the driver you want your teen to be, and show them that it's up to each of us to drive safely.

Enjoy the experience with your teen as you coach them through this guide. And together, *Let's Go Places*.

About this program

Developed by Safe Roads Alliance, a nonprofit dedicated to promoting safer driving through education for drivers of all ages, The Parent's Supervised Driving Program is designed to improve teen driver safety by providing parents and guardians with a methodical approach to teaching the requisite driving skills. Each lesson concentrates on a particular sequential skill. Parents are in the best position to help their teens become safe, smart, and skilled drivers.

The Parent's Supervised Driving Program also includes a website, social media pages, and a mobile app, RoadReady®.

Welcome parents of teen drivers!

The Parent's Supervised Driving Program is a resource for parents to utilize when teaching their teen to drive.

1. This program is divided into core driving skills.

- Read through each section at home before your teen starts a new skill.
- 2. Log your driving time. This can be done 2 ways:

 Carry this printed guide with you during the drive and use the printed log section – you or your teen can log the supervised driving hours once the drive is finished.

- Download and use the free RoadReady app to track your driving time. RoadReady tracks your teen's driving hours until you reach the state requirements.
- 3. Turn in your log when applying for your license.

WITH SUPPORT FROM

Teens' biggest dangers

Newly licensed teens crash much more often than older, more experienced drivers. These are the circumstances that are the most common trouble areas for young drivers.

Other teens

Research is clear on the fact that risky teen driving behaviors increase in the presence of teen passengers. A teen who is driving with other teens in the car is more likely to crash. And the more kids there are in the car, the stronger the likelihood of a crash. This is the primary reason many states have passed laws that restrict the ability of teens to drive with their peers.

Seat belts

The unfortunate reality is that teens buckle up far less frequently than adults. Recent studies show that belt use amongst teens is the lowest of any age group, just 76 percent compared to a national average of 85 percent. In fact, the majority (58 percent) of young people 16 to 20 years old involved in fatal crashes are unbuckled.

Drugs and alcohol

Teens are at far greater risk of death in an alcohol-related crash than the overall population. This is despite the fact they cannot legally purchase or publicly possess alcohol in any state. When alcohol is added to the inexperience of teen drivers, the results can be deadly. Drunk male teenage drivers are 18 times more likely than a sober male teen driver to be killed in a single-vehicle crash. Drunk female teenage drivers are 54 times more likely to be killed than a sober counterpart.

Fatigue

As teens get older their bedtimes get later, but waking times do not tend to change. From age 13 to 19, nightly sleep is reduced by 40–50 minutes. Teen drivers who sleep less than 8 hours a night are 33 percent more likely to crash than teens who get more than 8 hours of sleep. This lack of sleep results in depressive moods, more risk-taking behaviors, and lower grades. It further reduces a person's ability to process information, be attentive, and have good reflexes, which are all crucial to safe driving. Studies have shown that being awake for 18 hours has a similar impact to having a blood alcohol concentration (BAC) level of 0.08.

Distracted driving

A driver's primary responsibility when behind the wheel is to focus on the act of driving. Any behavior that distracts from that activity increases the risk of a collision. In this age of electronic communication, the dangers of distractions have increased significantly. Use of electronic devices for any purpose, to send or receive communications, to surf the web, to view images, video, or anything at all, should absolutely be avoided.

Inexperience

Just as it takes years to perfect any skill – athletic, artistic, or otherwise – it also takes years to be a truly good driver. Until teens are much more experienced, they run a greater risk of crashing, being hurt, and potentially dying. A driver's license makes them a driver. Experience makes them good drivers.

Night driving

For teens, the most severe crashes occur at night and on weekends. Night driving is challenging for all drivers, but novice drivers do not have the experience to anticipate and react when visibility is reduced. When teens drive at night, it is more often with a lack of adult supervision, with other teen passengers, and at higher speeds – all of which are factors that increase risk.

Drowsy driving

Staying alert means focusing on the road and not driving when fatigued. Review signs of drowsy driving, such as difficulty focusing, frequent blinking, or drifting from your lane. Remind your teen to take a break after driving for 2 hours, or after 100 miles. Teens should avoid driving at times they would normally be sleeping.

What is GDL?

Colorado implemented Graduated Driver Licensing (GDL) laws to help teenagers gain important driving skills gradually while limiting risk. While the GDL laws aren't always convenient for busy parents and teens, their impact on saving young lives is indisputable. Teen traffic deaths are down 67% since GDL laws went into effect in Colorado in 2005.

Definitions and details

Passenger restrictions: For the first six months, your teen cannot have any passengers under age 21, unless a parent or another licensed adult driver is in the vehicle. If after the first six months, you feel your teen is responsible enough to drive unsupervised with friends, he or she may do so but with only one passenger under age 21 for the next six months. Siblings and passengers with medical emergencies are exceptions. No more than one passenger is allowed in the front seat at any time.

Mandatory seat belts: By law, ALL teen drivers and passengers must wear seat belts (no sharing!). Teen drivers are also responsible for the safety of their passengers and can be ticketed if they are not properly wearing seat belts.

Power down!: Distracted driving can have deadly consequences. Teens under age 18 are prohibited from texting or talking on a cell phone while driving. Teens can be fined and may risk losing their license. Exceptions include emergency calls to the police or fire department.

Curfew: For the first year as a licensed driver, teen drivers must abide by a curfew – no driving between midnight and 5 a.m. unless accompanied by an instructor, parent or legal guardian. Exceptions include driving to and from school or work (signed statement from school or work is required), medical emergencies and emancipated minors.

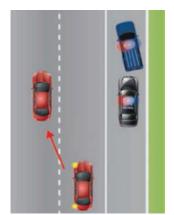

Zero tolerance for drunk driving: For minors, driving with even a trace of alcohol is punishable by law. Parents and teens should devise a back-up plan if necessary to make sure the teen arrives home safely. For a refresher on all traffic laws, parents can review the Department of Revenue's Drivers Handbook: www.Colorado.gov/Revenue/DMV. The Parent GDL Online Course is available at www.COTeenDriver.com.

Other ways teens can lose their license: Teens can lose his or her driver's license for being caught with alcohol or marijuana, even when not behind the wheel. Recent updates to the Minor in Possession laws state that an alcohol or marijuana violation by anyone under 21 will result in an automatic loss of the violator's driver's license.

New law in Colorado

Move Over Law: When you see stopped emergency vehicles on highways with activated red, white or blue lights in an adjacent lane, you must move over one lane, if you can do so safely. If it is not safe or you are traveling on a road that is one lane in each direction, you must slow down.

Colorado's Move Over Law protects law enforcement, fire, maintenance, other emergency personnel and you.

Source: Colorado Department of Transportation

A Note About Curfews

It is recommended to extend the hours of the mandatory curfew, as research shows that most teen crashes happen between 9pm and midnight. Encourage your teen to be off the road by 9pm.

About supervising teen drivers

The Parent's Supervised Driving Program gives you a simple, easy-to-follow plan you can use to help your teen be a safe and responsible driver during the required 50 hours of supervised driving time and beyond.

Some thoughts as you begin this exciting experience together:

Make an effort to enjoy the learning process: Driving is a big step toward independence, and your teen is entering a new phase of life. You'll both remember this experience for years to come. Make it a good memory!

Practice makes perfect: Studies show that the risk of a crash diminishes with experience. The more time you can spend driving with your teen, the less likely it will be that they'll crash when they begin driving alone. Driving in a variety of circumstances is equally important. While using this program, you should drive on all types of roads. Make sure your teen gets exposure to a variety of roadways, and in different conditions as well: at night; in rain, fog, and snow; and in heavy and light traffic.

Be a driving role model: It's not enough to say, "Do as I say." Children imitate their parents'/guardians' behavior, so your driving should set a good example for your teen to emulate. Be sure that you:

- · Obey all traffic laws.
- Correct any unsafe driving habits (driving aggressively, rolling through stop signs, accelerating through yellow lights, speeding, etc.).
- Refrain from using your cell phone or texting while driving.

Tips for teaching your teen

- Seat belts must always be worn properly by everyone in the vehicle.
- Before each session, discuss the goals of the day's lesson.
- Before each new lesson, review what was learned during the previous lesson.
- **Keep instructions simple and concise.** Say where to go and what action to take. For example: "Drive to the corner and turn right."
- The feedback you give should be calm, precise, and immediate. Be patient and alert at all times. Remember to give positive feedback when your teen succeeds!
- When your teen makes a mistake, which will happen often, do not criticize. Remain calm and simply repeat the maneuver until it's done correctly. To minimize their frustration, emphasize to your teen that mistakes are a normal part of learning.
- These lessons should be consistent with what is taught by your teen's driving instructor. If you teach something differently, your teen will be confused and learning will be more difficult. If the lessons in this program are different from the instructor's, contact them to clarify the discrepancy.
- Remember that students learn at different paces. Make sure your teen has mastered each skill before you move on to the next lesson, even if that means repeating a lesson several times. Patience and practice will pay off in the long run.
- Integrate night driving into as many lessons as possible. Ten of the 50 required supervised driving hours must be completed at night.

Most importantly, make sure the vehicle you use for training is safe. Confirm that the brakes have been recently inspected, and check to make sure the tires have sufficient tread depth.

Check your emotions

At the start of each driving lesson with your teen, leave your problems behind — and make an effort to stay focused. Don't bring up touchy subjects such as grades, homework, boyfriends/ girlfriends, and anything else that might distract either of you from the task at hand.

Vehicle control for supervisors

Teaching a new driver can be stressful, but knowing you have some control can help. Professional driver's education instructors are taught emergency responses to potential hazards that can crop up with an inexperienced driver behind the wheel. Here are some skills you can learn to help you maintain control from the passenger seat while teaching:

Emergency shifting: In a quiet, large, level, empty area, practice shifting the transmission from drive to neutral.

Taking the wheel: With an experienced driver in the driver's seat, in a quiet, large, level, empty area, practice steering the car with your left hand from the passenger seat.

Mirrors: Adjust the mirror on the passenger sun visor so you can use it as a rearview mirror. If the right side mirror is properly adjusted, you can use it to monitor traffic to the rear from the passenger seat.

Awareness: Never assume everything is okay. Always check and re-check mirrors before you give instructions to your teen.

Driving has changed

Chances are, today's cars are not the same as they were when you learned to drive. To teach your teen effectively, you need to know about a few important recent changes in how cars work, how we drive, and how driving is taught.

Anti-lock Brake System (ABS): Most newer cars offer ABS as either standard or optional equipment. ABS is a dramatic safety improvement that works by letting the tires rotate, rather than lock up, when the brake is engaged. This allows drivers to turn the car in an emergency stop. ABS should be used with firm, continuous pressure. The brakes may shake and grind when applied, which often concerns users – but this is a normal function of ABS. To find out if your car has ABS, check the instrument panel after you turn on the ignition or read the owner's manual.

Note: When driving a car without ABS, the old rules still apply. Don't "slam" the brakes. Rather, press the brake pedal firmly. The intention is to stop quickly, but also to avoid locking the brakes and skidding. Skidding causes a loss of control and requires more distance to stop.

Arms holding the wheel at 9 and 3 o'clock are not as likely to be hit by the air bag.

Air bags: Air bags are designed to work with seat belts, which must be worn for the air bags to be effective. Since air bags deploy out of the wheel on impact, it's important to keep your hands and arms clear.

Steering wheel hand position: Most of us were taught to position our hands at 10 and 2 o'clock on the steering wheel. It's now suggested that you hold the wheel at 9 and 3 or 8 and 4 o'clock. This gives you better vehicle control.

Commentary driving

Commentary driving is a great communication tool. Coach your teen to describe their actions, thoughts and observations out loud as they drive, similar to a sports commentator. Throughout the learning process, ask them to verbalize what they see around them, including potential risks and any steps they need to take to avoid those risks.

Distracted driving and more

Distracted driving involves any activity, such as cell phone use, that has the potential to distract someone from the task of driving. Distracted driving, alcohol, speeding, and not wearing seat belts can lead to death and injury in crashes. Teens, who are still learning the complex skills of driving, are particularly susceptible to distractions while behind the wheel. Don't let you or your teen become another statistic. Here are the facts:

- Motor vehicle crashes are the leading cause of death for U.S. teens. Mile for mile, teens are involved in 3 times as many fatal crashes as all other drivers. And 1 in 3 teens who text say they have done so while driving.
- In 2015, 3,477 people were killed and an estimated 391,000 people were injured in crashes involving a distracted driver. That's a 10.2 percent increase from the estimated 3,154 killed in 2013.
- A Virginia Tech Transportation Institute study revealed that physically dialing a phone while driving increases the risk of a crash as much as 6 times. Texting is riskier still, increasing collision risk by 23 times.

To combat this growing epidemic, we suggest the following:

- Know the law: It is illegal in Colorado for teen drivers under age 18 to talk or text on a wireless phone while driving. And for everyone 18 and older, texting while driving is strictly prohibited.
- Set a good example: Kids observe and learn from their parents. Put your phone down while driving and only use it when you are safely pulled over. According to the Pew Research Center, 40 percent of teens 12 to 17 say they have been in a car when the driver used a cell phone in a way that put themselves and others in danger.
- Talk to your teen: Discuss the risks and responsibilities of driving and the danger of dividing their attention between a phone call and the road. Show them the statistics related to distracted driving and urge them to share what they learn with their friends. Make them aware of other consequences like an expensive ticket and points against their license that could put them at risk of losing their freedom to drive.
- Establish ground rules: Set up family rules about not texting while behind the wheel. Enforce the limits set by the Graduated Driver Licensing program.
- Sign a pledge: Have your teen take action by agreeing to a family contract about wearing safety belts, not speeding, not driving after drinking, and not using a cell phone behind the wheel. Agree on penalties for violating the pledge, including paying for tickets or loss of driving privileges. You can find a sample contract in the center of this guide.
- Other dangerous distractions: In addition to cell phone use, distracted driving can include eating, grooming, drinking, listening to or adjusting the radio or MP3 player, using the GPS, talking to passengers, or watching a video, just to name a few activities. Inexperienced drivers are particularly susceptible to these kinds of distractions.

Just because it's legal doesn't mean it's safe: According to the National Institute on Drug Abuse, use of illicit drugs or misuse of prescription drugs can make driving a car unsafe—just like driving after drinking alcohol. Drugged driving puts the driver, passengers, and others who share the road at risk.

- It is illegal to drive under the influence of marijuana.
- It is illegal to use marijuana under the age of 21.
- Marijuana can negatively impact your ability to safely control a vehicle.
- Use of marijuana will slow your reaction time and impair your judgment.
- Marijuana effects your coordination, your memory, and ability to problem-solve.
- Combining marijuana and alcohol, even in small doses, greatly increases the risk of getting into a crash. (https://www.ncbi.nlm.nih.gov/pmc/articles/PMC2722956/)

If you plan to drive, be smart and have no alcohol, marijuana, or any other drugs in your system.

Eyes on the road

Teens tend to look away from the road and become distracted for longer periods than older drivers. It's important to train them to keep their eyes on the road ahead. Test your teen on how long they look away when doing various tasks inside the vehicle, such as adjusting the temperature. Coach them repeatedly on the importance of focusing on the road ahead.

Before you start the engine

Goal: Teach your teen vehicle basics before actual driving begins.

Location: Parked. This is a non-driving lesson.

Lesson one – touring the vehicle

Walk around the outside of the car with your teen. Instruct them to look for leaks and hazards such as broken glass, and to make sure it's clear behind the vehicle as well as in front of the vehicle.

Have your teen practice these basic skills until they don't need help:

- · Starting and stopping the engine
- Naming and operating all dashboard controls
- · Checking oil level
- · Checking wiper fluid
- · Checking tire pressure

Lesson two – mirror settings

The method below provides the best view of adjacent lanes, for maximum safety.

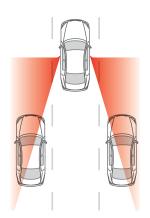

- Inside mirror: Have your teen sit up straight in the driver's seat and adjust the inside mirror so that it frames the entire rear window. This is the main mirror for viewing what is behind the vehicle.
- Left-side mirror: Have your teen lean their head toward the left-side window, and set the left mirror so they can barely see the side of the car. When they sit up straight, the car should no longer be visible in the mirror.
- Right-side mirror: Do the same to the right. Have your teen lean to the right over the car's center console, and set the right mirror so they can barely see the right side of the car.

Lesson three – checking blind spots

Additionally, teach your teen how to look over their shoulder to check the "blind spot" on each side of the car that cannot be seen in the mirrors.

Lesson four – seating position

The proper seat position is important to safely control the vehicle. Your teen should sit with their back firmly against the seat. There should be at least 10 inches between the steering wheel and the driver's chest, with the air bag pointing at the chest. The top of the steering wheel should be no higher than the shoulders. Move the seat forward or backward so that the driver's heel touches the floor and can pivot between the brake and accelerator. Shorter drivers may need a seat cushion or pedal extenders to sit safely 10 inches from the air bag. The head restraint should be at the center of the driver's head. Before planning a trip, collect pre-trip information from CDOT's "COtrip" website which is www.cotrip.org

The most effective way to deal with blind spots is to briefly turn and look.

Proper mirror setting

In the past, drivers were often taught mirror settings that caused overlap between the rear and side mirrors. which was less safe. This is a great opportunity to update your own driving skills while teaching your teen!

Skill completed

supervisor initials

driver initials

#RoadReadv

Moving, steering, and stopping

Goal: Teach your teen to consistently start, stop, and turn smoothly with full vehicle control.

Location: A large, level, mostly empty area.

Everyone in the vehicle **must** be properly buckled up.

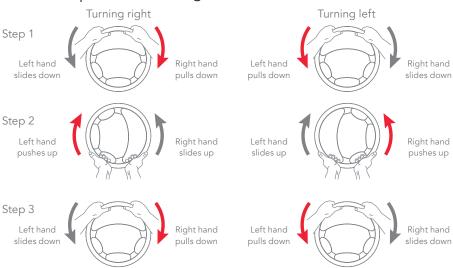

Before starting, coach your teen to always signal and check mirrors and blind spots before changing the speed, position, or direction of the car. Remind them when needed.

Have your teen drive around the perimeter of the lot several times at a slow speed. Have them stop and start frequently, practicing smooth hand-to-hand steering, braking, and accelerating.

Pick several targets in the large, level, empty practice area, and have your teen drive to them at specific speeds. For example, "Drive to the stop sign at 15 mph." Focus on steady speed and smooth starts and stops.

Once your teen is braking smoothly, practice "hard, smooth stops" at slightly higher speeds (approximately 25–30 mph). Hint: Curling toes back just before braking results in smoother stops. It eases the pressure on the brake.

Lesson one – steps toward turning

With hand-to-hand steering your hands do not cross each other.

Lesson two - turning techniques

- Ease off the accelerator or use the brake to reduce speed before entering a curve; use gentle acceleration to overcome inertia and pull the vehicle out of the curve.
- Use smooth, continuous steering wheel movements when approaching a turn and when returning (sliding) the wheel through the hands until the vehicle is in the proper post-turn position.
- Coach your teen to pick a target near the center of the intended travel path. This target can be used as a visual aid to aim at while steering through turns.

Controling speed

New drivers tend to use the brake too much and the accelerator too little to control speed. Coach your teen about easing up on the gas pedal as a way to reduce the car's speed.

Skill completed

driver initials

#RoadReadv

How close are you?

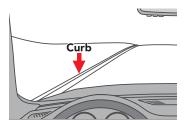

Goal: Teach your teen how to tell where their vehicle is in relation to other vehicles or objects.

Location: A large, level, mostly empty area with clearly painted pavement lines and curbs.

Reference points

Explain to your teen that reference points are visual guides to help them judge the car's distance from curbs, lines, other objects, and vehicles.

Lesson one – driver's side curb (or line)

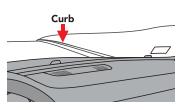

View out the front windshield. Reference points will be different for everyone, depending on the vehicle and the height of the driver.

- Choose a pavement curb (or line), and tell your teen that the goal is to pull the driver's side of the vehicle 6–12 inches away. Coach them to slowly pull up parallel to the line, getting gradually closer, and stop when they think they are 6–12 inches away. Have them look at where the line intersects in the front window.
- Have your teen put the car in park and get out to check if the driver's side wheels are 6–12 inches from the line. If it's not the right distance, have them do it again, checking the reference points.

Making your teen safer

Even though Colorado law only requires 50 hours of supervised driving time over twelve months, studies show that the more time you drive together, the safer your teen will be when driving alone.

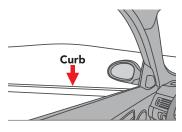

Lesson two - passenger's side curb (or line)

View out the front windshield. Reference points will be different for everyone, depending on the vehicle and the height of the driver.

- Choose another curb (or line) parallel to the passenger's side, again pulling up slowly to within 6–12 inches. Use the same gradual pull-up method, but for this side, coach your teen to stop when the curb appears to intersect the center of the hood.
- Again, have your teen get out of the vehicle to check whether the
 tires are 6–12 inches from the curb. Keep practicing and making
 adjustments, noticing the reference point, until they can do
 it consistently.

Lesson three – front curb (or line)

View out the driver's side window. Reference points will be different for everyone, depending on the vehicle and the height of the driver.

- Teach your teen to align the front bumper between 6–12 inches from a pavement curb (or line). Have them drive slowly straight toward the curb. Coach them to stop when the curb appears under the passenger's side mirror.
- Have your teen get out of the vehicle to check whether the front bumper is 6–12 inches from the curb. If not, have them adjust the reference point as needed and keep practicing.

#RoadReady

Slow and consistent

Emphasize that backing up must be done at slow

but consistent speeds. It's harder to maintain

control of the car when

it's in reverse.

Backing up

Goal: Teach your teen how to safely drive backwards in a straight line and while turning.

Location: A large, level, mostly empty area.

Lesson one – before moving the vehicle

- Coach your teen that they must turn around and look backwards through the rear window when backing up. Using mirrors or backup cameras doesn't give a full view.
- Have your teen shift their hips and turn around until they get a good view behind the vehicle. They
 should drape their right arm over the back of the seat and grasp the top of the steering wheel with
 their left hand.

Lesson two - backing up in a straight line

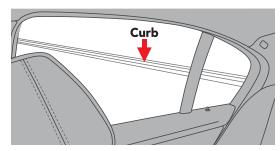

- Check all areas behind the vehicle prior to and while backing up.
- Grasp the steering wheel with the left hand and look over the right shoulder through the rear window.
- First release the brake, then use the accelerator gently, and only when necessary, to control speed. Keep it slow.

Lesson three - backing up in a turn

- If turning to the left, grasp the steering wheel with the right hand, or with the left hand if turning to the right. Remind your teen to turn the wheel in the direction they want the car to travel.
- · Look in the direction the car is moving through the rear side windows.
- · Back into the turn slowly, first releasing the brake, then using the accelerator if needed.

Lesson four – aligning rear bumper to a curb

- Choose a curb (or line) for a target.
- Have your teen back up toward the target, coaching them to stop when the curb appears near the middle of the rear right window when looking over their right shoulder.
- Have your teen put the car in park and set the emergency brake.
- Have your teen get out of the car to see whether the rear bumper is close to the target.
- If adjustments are needed, have your teen try again, establishing a new reference point.
 Repeat as often as needed until your teen can consistently come within close proximity to the target.

The driver's view out of the back passenger window. Reference points will be different for everyone, depending on the vehicle and the height of the driver.

Driving on a quiet street – part one

Goal: Teach your teen to move and stop a vehicle safely and with confidence on quiet roads.

Location: Start in a large, level, mostly empty area. Move to a quiet neighborhood street when indicated. Before moving out onto the road, make sure that your teen has reviewed the driver's manual (available for download at www.Colorado.gov/Revenue/DMV) and is familiar with street signs, signals, pavement markings, and yield and speed laws.

Skill review

Starting in a quiet, large, level, empty area, review the skills learned so far. Have your teen drive several laps around the lot, practicing smooth braking and accelerating, maintaining steady speeds, steering into right and left turns, and using reference points to align the car with curbs (or lines).

Lesson one - commentary driving

Coach your teen to use "commentary driving" (see sidebar on page 4) throughout this lesson, if possible.

Lesson two – lane position

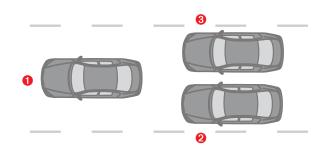

When you and your teen feel ready, move to a quiet street.

With your teen behind the wheel, first have them practice driving straight in three different lane positions. Do this for several miles, practicing each position at least 10 times:

Center position ①: The most common position, with the vehicle centered within the lane. Coach your teen that they should stay in the center position under most circumstances.

Left position 2: The vehicle positioned to the left side of the lane. This is usually done when making a left turn, to allow for a safety margin on the right side of the vehicle.

Right position 3: The vehicle positioned to the right side of the lane. This is usually done when making a right turn to allow for a safety margin on the left side of the vehicle.

Most driving is done in lane position number one.

Emergency vehicles

Make sure your teen understands what to do if they encounter emergency vehicles. First, turn down the radio to listen for the direction of the emergency vehicle(s). Stay calm and pull over to the nearest curb, clear of intersections, and wait for the emergency vehicle(s) to pass.

Lesson three – intersections

Coach your teen on these techniques for safely approaching an intersection:

- Search for vehicles, pedestrians, signs, and traffic signals.
- Check the rearview mirror for any potential hazards behind the car.
- If it's an intersection with traffic signals, identify who has the green light.
- If turning, put on the turn signal three seconds before making the turn.
- If a stop is required, stop behind the white stop line.
- Select the best lane for the intended direction of travel.
- Yield the right-of-way to pedestrians and other vehicles.

Skill completed

supervisor initials

driver initials

#RoadReady

Driving on a quiet street – part two

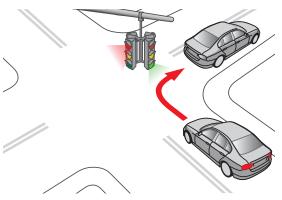

Goal: Teach your teen to turn both right and left safely and with confidence on quiet roads.

Location: A quiet block of single-lane roads, ideally without traffic signals at the intersections.

Lesson one - right turns

When your teen is comfortable with lane positions and intersections, it's time to practice turns. Start with right turns. Have your teen drive clockwise around the block 10–12 times:

- Pick a line at the center of the intended travel path while steering through a turn. Make sure your teen does not fixate on one specific spot, but instead focuses on a broader path.
- Focus on smooth braking into the turn and acceleration out of the turn, as previously practiced in the large, level, empty area.
- Always check mirrors before turns and signal at least three seconds before turning.

Have your teen drive around the block making right turns 10–12 times. When they are proficient, drive around the block 10–12 times making left turns.

Lesson two – left turns

When your teen is proficient at right turns, move on to left turns. Have your teen drive counterclockwise around the block 10–12 times, coaching them on these techniques for safe left turns:

- Position the vehicle close to the yellow line in the middle of the road.
- If there is a stop sign or red light, stop with wheels pointed straight ahead before the stop line, crosswalk or intersection.
- \bullet Search the intersection in all directions for vehicles, pedestrians, signs, and signals.
- Select a gap in traffic and pull straight forward toward the middle of the intersection. Coach your teen to avoid hesitating.
- Choose a steering path in the middle of the lane to the right of the yellow line. Turn into the travel lane closest to the yellow line.
- When the turn is complete, let the steering wheel slide back through the hands.
- Pick a new target 15-20 seconds ahead in the center of the travel path and accelerate gradually.

Be sure to practice with your teen in a variety of conditions, including at night and in inclement weather, as much as possible.

Skill completed

Focus ahead

Most drivers have a

tendency to steer in the direction they look. If

their eyes move to one side, the car may drift in that direction, too. Remind your teen to focus on a path line in the middle of their travel lane – and not fixate on lane lines or other objects. The rest of the area should be scanned quickly but frequently.

supervisor initials

driver initials

#RoadReadv

Looking ahead

Goal: Teach your teen to develop defensive driving techniques and higher-level visual and anticipatory driving skills before moving on to more complex driving situations. In order to avoid last-second reactions and spot potential hazards, have your teen always look 12–15 seconds down the road. When they are looking far enough ahead, they will be able to spot hazards early and be well prepared to react to them.

Location: Start on a quiet neighborhood street. Out of respect to our neighbors, please do not use official state road test courses for practice. Move onto a road with light traffic when your teen is ready.

Lesson one – IPDE system

Teach your teen the IPDE system, a simple system to help new drivers recognize, anticipate and avoid risks before they turn into problems. IPDE stands for:

Identify potential risks, like oncoming vehicles, pedestrians, obstacles, or intersections. **Predict** when and where there will be a conflict or problem.

Decide on the best course of action.

Execute that action.

Have your teen use commentary driving as they practice the IPDE system. As they drive, ask them to verbally describe their thoughts and actions in order to identify potential risks they see, predict problems these risks could cause, decide what to do to avoid a problem, and then execute the maneuver.

Lesson two - stopping-distance rule

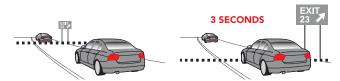

Teach your teen the stopping-distance rule, for the safest distance to stop behind another vehicle. When your vehicle stops, you should be far enough away from the car in front of you that you can see where its tires make contact with the ground. Any closer is too close.

Lesson three - three-second rule

Teach your teen the three-second rule for the appropriate following distance when driving behind other vehicles. The three-second rule is an important safety measure designed to give drivers enough time to safely steer or brake to avoid problems that occur in front of them on the road.

- Start counting when the rear bumper of the vehicle in front of you passes an object.
- Count "one thousand ONE, one thousand TWO, one thousand THREE."
- Your front bumper should not pass that same object before you've reached "three."

Have your teen practice the three-second rule at least 10–12 times, counting out loud to check whether their following distance is appropriate.

Your front bumper should not pass before you've reached "three."

Minimize risks

Rear-end collisions are the most common form of a car crash. Emphasize to your teen that increasing following distance behind other vehicles is the single best thing they can do to minimize the risk of a crash.

Prototype shown with options. Production model may vary. Drivers are responsible for their own safe driving. Always pay attention to your surroundings and drive safely. Depending on the conditions of roads, weather and the vehicle, the system(s) may not work as intended. See Owner's Manual for additional limitations and details. 1. The TSS Pre-Collision System is designed to help avoid or reduce the crash speed and damage in certain frontal collisions only. It is not a substitute for safe and attentive driving. System effectiveness is dependent on road, weather and vehicle conditions. See Owner's Manual for additional limitations and details. 2. The Pedestrian Detection system is designed to detect a pedestrian ahead of the vehicle, determine if impact is imminent and help reduce impact speed. It is not a substitute for safe and attentive driving. System effectiveness depends on many factors, such as speed, size and position of pedestrians, and weather, light and road conditions. See Owner's Manual for additional limitations and details. 3. Automatic High Beams operate at speeds above 25 mph. Factors such as a dirty windshield, weather, lighting and terrain limit effectiveness, requiring the driver to manually operate the high beams. See Owner's Manual for additional limitations and details. 4. Dynamic Radar Cruise Control is designed to assist the driver and is not a substitute for safe and attentive driving practices. System effectiveness is dependent on road, weather and traffic conditions. See Owner's Manual for additional limitations and details. 5. Lane Departure Alert with Steering Assist is designed to read lane markers under certain conditions, It provides a visual and audible alert, and slight steering force when lane departure is detected. It is not a collision-ovoidance system or a substitute for safe and attentive driving. Effectiveness is dependent on road, weather and vehicle conditions. See Owner's Manual for additional limitations and details. ©2017 Toyota Motor Sales, U.S.A., Inc.

Supervised driving log

A parent, legal guardian or responsible adult 21 years of age or older, who signed the Affidavit of Liability and Guardianship, must certify that the driver has completed at least 50 hours of driving experience, of which 10 hours must be at night. The Supervised Driving Log on the following pages should be used to keep track of practice driving time. You can also use the Log to assure your teen is practicing in a variety of driving environments and weather conditions. This Log will need to be turned in to the DMV when your teen goes to take their road test.

GDL systems

Graduated Driver Licensing (GDL) systems are intended to provide teen drivers with practice under the safest conditions, exposing them to more situations only as their skills and experience grow.

DRIVING RULES	CONSEQUENCES
1. PASSENGER RESTRICTIONS	
☐ I agree to abide by the state law for passenger restrictions. I will have no passengers under 21 during the first six months with my license and no more than one passenger under 21 until I have had my license for one year.	☐ Lose driving privileges for wks/mos
\square At any time there will be only one passenger in the front seat.	
2. SEAT BELTS	☐ Lose driving privileges for wks/mos
☐ I will always wear a seat belt.	Other:
\square All of my passengers will wear seat belts, as required by law.	U Other.
3. CURFEWS	
☐ I will not drive after p.m. at night.	☐ Lose driving privileges for wks/mos
I understand that it is against state law to drive between midnight and 5 a.m. for the first year with my license. Check local curfew, which may vary from state laws.	☐ Other:
4. CHECK IN	☐ Lose driving privileges for wks/mos
☐ I will check in with my parent(s) or guardian(s) every time I drive and let them know where I am going,	Other:
who I am going with and when I will return.	U Other.
5. ALCOHOL AND DRUGS	☐ Lose driving privileges for wks/mo:
☐ I will never use alcohol or drugs when I am driving and never ride with someone who has used them. Colorado has a ZERO TOLERANCE law for minor drivers.	Other:
6. DISTRACTIONS	
$\ \square$ I will not talk/text on my cell phone while driving, as required by law.	
☐ I will not eat while driving.	☐ Lose driving privileges for wks/mo
\square I will not adjust the radio, CD or MP3 player when driving.	☐ Other:
\square I will not wear headphones to listen to music while driving.	
\square I will not allow any passenger "horseplay" while driving.	
7. DRIVING WHILE TIRED OR EMOTIONAL	☐ Lose driving privileges for wks/mos
☐ I will not drive if I am overly tired.	
\square I will not drive if I am overly emotional (i.e. excited, angry, sad).	☐ Other:
8. TRAFFIC LAWS	☐ Lose driving privileges for wks/mos
☐ I will obey all traffic laws and rules of the road.	☐ Other:

Turning around

Goal: Teach your teen the best ways to turn a vehicle around in various circumstances.

Location: Start on a quiet neighborhood street with accessible driveways. Please be respectful of neighbors and private property. Move to a multi-lane road for U-turns, if legally allowed in your area.

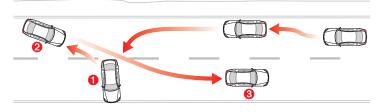

Lesson one - turning around safely

Start by coaching your teen that the safest and easiest way to turn around is to drive around the block. Since that's not always possible, it's important to practice other ways to turn around.

Lesson two – three-point turns

This more challenging turn should only be done when there is no available driveway. Three-point turns block both sides of a two-lane road, so coach your teen to make absolutely sure that the traffic is clear in both directions:

- Position yourself as close as possible to the right edge of the curb. Signal a left turn. Check for traffic and pedestrians in both directions (including your blind spot). Wait until there is a 20-30 second gap to complete the turn.
- Move slowly and turn the steering wheel quickly to the left. This will bring the

Practice three-point turns at least 10 times each.

- vehicle perpendicular to the street about two feet from the curb. Come to a stop.
- Turn the steering wheel fully to the right. Check for traffic in both directions (including your blind spot). Shift into reverse and start backing up, while looking over your right shoulder.
- Back up to the opposite curb, stopping just before the curb.
- · Check again for traffic in both directions (including your blind spot). Signal a left. Shift into drive (or for manual cars, first gear) and accelerate to the proper speed.

Lesson three – U-turns

First explain that U-turns can be very dangerous, and should only be done where they are legal.

- Begin the U-turn in the left lane, closest to the center line or median.
- Be sure there is enough room to make the turn without hitting the curb or any parked cars.
- Signal to indicate the direction of the turn, checking carefully for oncoming traffic.
- Move forward, turning the wheel sharply to turn around.
- Finish the U-turn in the opposite direction and accelerate to an appropriate speed.
- U-turns should never be made across a double yellow line or where a sign indicates that they are prohibited.

Backing up

Remind your teen to always look in the direction they are backing up and to back up slowly. When backing up a vehicle they need to remember they are responsible for traffic in all directions. Make sure they understand they do not have the right of way and must take care not to interfere with other traffic.

#RoadReadv

Parking – part one

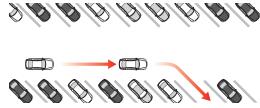

Goal: Teach your teen to master angle and perpendicular parking.

Location: Start in large, level, mostly empty areas. You will need angled and perpendicular spaces.

Lesson one – angle parking

The gentler turn makes this the easiest type of parking for new drivers.

- Signal to indicate intent to turn into a parking space.
- Move forward until the steering wheel is aligned with the first pavement line marking the space.
- Look at the middle of the parking space and turn the wheel sharply at a slow, controlled speed.
- Steer toward the center of the space, straightening the wheel upon entry.
- Stop when the front bumper is six inches from the curb or from the end of the space.
- After you've parked, put the gear in park for automatic transmissions (for manual transmissions, put the car either in first or reverse) and set the parking brake. Shut off the ignition and remove the key. Check for traffic prior to getting out. Lock the doors.

Turn when the front of your vehicle reaches the edge of the space. Stay alert for cars backing out to leave their space.

Lesson two – perpendicular parking

- The steps are the same as angle parking, but the sharper turn into perpendicular spaces may require more practice.
- Practice, practice, practice: Have your teen practice angle and perpendicular parking 15–20 times each.

Turn when your outside mirror reaches the edge of the space. Always finish with your wheels straight and your car centered in the space.

Lesson three – exiting spaces

- With a foot on the brake, shift into reverse, which will signal that you will be backing up.
- Turn around to look for oncoming traffic.
- For **angled spaces**, back up straight until the driver's seat is even with the bumper of the next vehicle on the turning side. For **perpendicular spaces**, back up straight until the windshield is aligned with the bumper of the next vehicle.
- Quickly turn the wheel in the direction that the rear of the car needs to go.
- Glance forward to make sure the front bumper is clear of the car on the other side.
- When the front bumper clears the other vehicle, stop, shift into drive, and pull forward to complete the exit.

Disabled parking: The person that owns the disabled placard must be entering or exiting the vehicle in order to park in a disabled parking space. If you park illegally in a designated disabled parking spot without a placard or plate, you will be subject to a misdemeanor with a fine between \$350 to \$5,000, possible jail time, loss of driving privileges, and your car can be impounded.

Parking – part two

Goal: Teach your teen to master parallel parking.

Location: A street with marked parallel parking spaces at a time of day when traffic is light.

Lesson one - parallel parking

Parallel parking is a difficult maneuver for new drivers, so patience is key. Many drivers never learn to do it well, especially in areas where it's not common. Because of the difficulty of learning parallel parking, and because there are several different teaching methods, **this skill is sometimes best taught by a professional driving instructor**. Assess your own parallel parking skills and your teen's abilities before beginning.

Start by practicing with cones before graduating to practicing alongside vehicles.

- Select an available space on the passenger's side of the car.
- Signal when approaching the space and check mirrors for traffic behind the vehicle.
- Move forward past the space until lined up directly parallel to the car parked in front, 2–5 feet away. Being too close or too far away will make parking more difficult.
- With a foot on the brake, shift to reverse and turn around to check for traffic and make sure the travel path is clear.
- Release the brake, start backing up slowly, and start to make an "S" turn, turning first right and then left.
- Glance both forward and backward repeatedly to check the space around the car while turning.
- · Once the rear of the car is mostly in the space, start turning in the other direction to straighten out.
- Adjust the vehicle's position as needed to center it in the space.
- Check to see if the wheels are 6–12 inches from the curb. If not, pull out and try again.
- Always check for passing vehicles and cyclists before you open your door.

Lesson two – exiting a parallel parking space

- With a foot on the brake, shift to reverse, turn around, and back as close as possible to the vehicle behind you.
- Check for traffic, signal, and shift into drive.
- · Make sure the travel path is clear, then move slowly forward while steering rapidly out of the space.

Lesson three – parallel parking on a hill

Make sure the vehicle is in park and the parking brake is properly engaged. To prevent the vehicle from rolling into traffic, instruct your teen to turn the front wheels as follows:

- Toward the curb when parking downhill
- · Away from the curb when parking uphill

If there is no curb, have your teen point the wheel so that the car would roll away from traffic if it moved.

Parking takes practice

When practicing parallel parking, your teen will probably hit the curb several times. Tell them not to worry – even the best parallel parkers do this often. Coach them to pull out of the space and try again, adjusting their turning angle as needed.

Skill completed

supervisor initials

driver initials

#RoadReady

Multi-lane roads – part one

Goal: Teach your teen to drive safely and with confidence on busier, more complex, multi-lane roads.

Location: A busier, multi-lane road. Choose a time with limited traffic, such as a weekend morning.

Skill review

By now, your teen should be comfortable driving on quiet roads. Before starting multi-lane road practice, it's important to review some key information from previous lessons. The following skills are crucial to safe driving on busier, more complicated roads.

Lesson one – mirror positioning, monitoring and blind spots

Refer to Skills one and two. Clearly seeing the adjacent traffic is especially important on multi-lane roads. Remind your teen to check the mirror positions when entering the car, and to constantly monitor the traffic around them.

Lesson two - stopping distance

Refer to Skill six. Remind your teen that when stopping their vehicle behind another one, they should be far enough back to see where the other car's tires meet the road.

Lesson three - following distance

Refer to Skill six. Review the three-second rule with your teen, emphasizing that increasing following distance is the single best way to reduce crash risk. This gives the driver visibility, time, and space to avoid crashes.

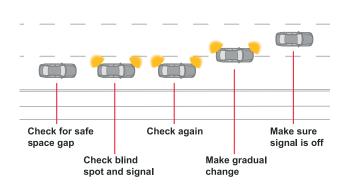

Lesson four - safe lane changing

First, coach your teen not to change lanes unnecessarily. Studies show that while it may not look like it, most travel lanes flow at around the same rate. Changing lanes in an effort to save time doesn't actually save time, but it does increase crash risk.

Ask your teen to list valid reasons to change lanes. Good answers include: to make a turn, to avoid an obstacle, to exit the road, to park, or to pass another vehicle.

Have your teen practice these lane change steps 15–20 times:

- Check traffic to the rear and the sides for an appropriate gap.
- Signal to indicate intention to change lanes.
- Recheck traffic, including a glance over the shoulder at the mirror blind spot area.
- Maintain speed or accelerate slightly before and during the lane change.
- Gradually move into the new lane.
- Adjust following distance, using the three-second rule.

When changing lanes, always recheck traffic with a glance over the shoulder at the blind spot.

Multi-lane roads – part two

Goal: Teach your teen to drive safely and with confidence on busier, more complex, multi-lane roads.

Location: A busier, multi-lane road. Choose a time with limited traffic, such as a weekend morning.

Lesson one - right turns

Start with right turns, which are fairly simple. Right turns are always made from the right lane of the current road to the first, open lane of the new road. Look for signs and signals that indicate whether "right on red" is allowed. Practice right turns 10–12 times before moving on to left turns.

l esson two – left turns

Left turns should almost always begin and end in the closest lane to the right of the yellow line. Choose a steering path in the middle of the closest lane to the right of the yellow line.

There are three types of left turns:

- **Protected left turns** with a designated left turn lane and left turn signal
- Semi-protected left turns made from a center or shared turn lane
- Unprotected left turns made from an active travel lane

Protected left turns should be made from the designated lane when the left turn signal displays a green arrow.

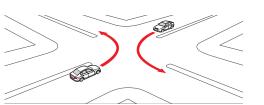

For semi-protected and unprotected left turns, coach your teen on these steps:

- Make sure the vehicle is in the correct lane to make a left turn.
- Signal the turn and begin slowing down at least 100 feet from the intersection.
- · Move carefully into the intersection. Don't turn the wheel until you're ready to make the turn.
- Yield to any vehicles, bicycles, or pedestrians.
- When there is sufficient space with no oncoming traffic, move ahead into the turn.
- Choose a steering path line in the middle of the closest lane to the right of the yellow line.

Lesson three - safe passing procedures

Discourage your teen from passing other cars unnecessarily. If passing is necessary, the following steps should be observed:

- Position your vehicle more than four seconds behind the vehicle to be passed.
- Check mirrors and blind spots for oncoming traffic.
- Check the passing lane ahead to make sure there's plenty of space before you try to pass.
- Signal intent to pass and accelerate quickly to match the speed of traffic flow.
- While passing, monitor the space in front of and behind your vehicle and check the rearview mirror for the front of the car being passed.
- When you see the front of the passed car in the rearview mirror and your vehicle is well clear, signal intent, gently and slowly move back to the original lane, cancel the signal, and maintain speed.

Don't turn the wheel until you're ready to make the turn.

Making left turns

Left turns are one of the hardest maneuvers for teens to master. Be patient. New drivers often have difficulty judging the speed and distances of multiple lanes of oncoming traffic. Practice judging oncoming vehicles' distance from your vehicle by counting out loud the time it takes for them to reach your car from a designated point.

driver initials

City driving – part one

Goal: Teach your teen to drive safely and confidently in the complex environment of city driving. Note: City driving takes hundreds of hours, if not several years, to master.

Location: Busy, urban streets. Start at times when traffic is light, moving on to heavier traffic times as your teen gains skill in this situation.

Skill review

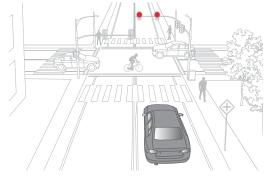

Since the busy, crowded environment of city driving is challenging for new drivers, this is a good time to review key driving skills. The most important skill for drivers is the ability to make good decisions. City driving forces drivers to make lots of decisions quickly. The three things they need to drive safely in the city are:

- Visibility: To see potential problems in all directions
- Space: To maneuver around obstacles and avoid hazards
- Time: To anticipate risks and make adjustments to speed or position

Lesson one – maximizing visibility and space

As you practice, have your teen focus on making decisions that will maximize visibility and space around the vehicle, increasing the available reaction time.

- Looking ahead (refer to Skill six): Congested city driving leaves very little room for error. Identifying and anticipating potential problems is crucial.
- Covering the brake: Coach your teen that when they spot a hazard, they should "cover" the brake by taking their foot off the accelerator and holding it over the brake. This will prepare them to slow down or stop suddenly. Make sure they don't "ride" the brake. Riding the brake confuses other drivers and puts unnecessary wear on the brakes.

Looking ahead, identifying and anticipating potential problems is crucial for safe driving.

Lesson two – identifying hazards

As you begin city driving practice, have your teen drive through several blocks to identify and name common hazards on busy, congested streets. Ask them to describe how they will safely deal with each hazard they identify.

Such hazards may include:

- · Parked cars, cars entering or exiting parking spaces, and car doors opening
- Delivery trucks stopping suddenly, with drivers racing to and from the trucks
- Buses making frequent stops, loading and unloading passengers
- · Blind alleys, with cars or cyclists darting out
- Pedestrians and cyclists moving unpredictably, crossing streets illegally, etc.
- Limited visibility and intersections spaced at shorter intervals
- Aggressive drivers competing for lane space and parking spots
- Stop-and-go traffic flow

#RoadReadv

City driving – part two

Goal: Teach your teen to drive safely and confidently in the complex environment of city driving. Note: This is not a goal that will be achieved in a single session. Spend as much time as possible with your teen practicing safe city driving skills.

Location: Busy urban streets. Start at times when traffic is light, moving on to heavier traffic times as your teen gains skill.

Lesson one - avoiding obstacles

Focus on lane position to avoid obstacles: City driving involves many circumstances in which travel lanes are shared, congested, and partially or fully blocked. During practice sessions on busy city roads, have your teen identify these steps to safely avoid obstacles:

- Identify right-lane obstacles, such as stopped buses, parked cars, delivery trucks, and cyclists.
- Identify left-lane obstacles, such as vehicles waiting to make a left turn, or cars traveling in the opposite direction drifting over the center line.
- Identify the least-congested travel lane. Hint: On a three-lane road, this is usually the center lane.
- Position the vehicle in the lane at the greatest distance possible from any obstacles.

It can be tempting to pass vehicles on congested streets, when obstacles or traffic volume slow traffic. However, this can be dangerous, due to closely spaced intersections, irregular traffic flow, cars entering and exiting parking spots, etc. Coach your teen to avoid passing on busy city streets.

Lesson two – deadly distractions

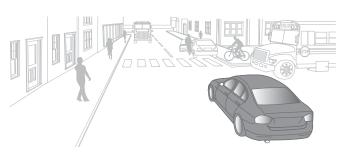

What happens inside the car can be just as dangerous as what happens outside. Engaging in distracting activities while driving can be deadly, especially for young drivers. Ask your teen to list dangerous driving distractions. Their answers should include:

- · Talking or texting
- Changing radio stations, or shuffling/streaming music – or dialing a phone
- Passengers, pets, or objects moving in the car
- Eating, drinking, or smoking
- · Searching for an item
- Intense or emotional conversations
- Putting on makeup or looking in the mirror

Coach your teen to avoid distracting activities whenever possible, but especially in busy, congested environments. Remind them to focus on keeping as much space as possible around the vehicle at all times.

More is better

City driving skills take a long time to acquire. Spend as much time and drive in as many circumstances with your teen (night, inclement weather) as you are able. Plan trips to less-familiar places where you might not normally travel.

Remind your teen to stay alert, scan their surroundings, and not fixate on any one thing.

Skill completed

supervisor initials

driver initials

Highway driving – part one

Goal: Teach your teen highway basics and how to safely enter and exit a highway.

Location: Start on a multi-lane highway with easily accessible exits, at a time when traffic is light, such as a weekend morning. Move on to practice at heavier traffic times when your teen is ready.

Lesson one – observation

Have your teen spend some time on highways with you as the driver and your teen as the passenger. Emphasize the importance of looking ahead to anticipate potential problems, and explain key highway features, such as:

- The different kinds of interchanges
- The meanings of highway signs and signals
- The meanings of different lane lines and markings

Teach your teen three rules to remember when driving on a highway:

- Maintain proper speed.
- · Create space.
- Always use your signal.

Lesson two - on-ramp segments

Explain the three segments of on-ramps, and how they're used:

- Entrance area: This stretch allows the driver time to search the highway and evaluate how much space they have to enter and what speed is needed.
- Acceleration area: The driver brings the vehicle up to the speed of highway traffic flow.
- Merge area: The driver uses this space to merge into the traffic flow.

Lesson three - merging

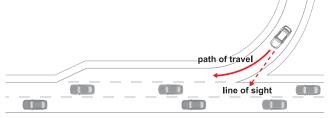

Teach the steps for merging onto a highway:

- At the entrance area, make quick glances at the highway, scanning for vehicles and entry gaps.
- In the acceleration area, signal to show intent to enter the highway and adjust speed to match the traffic flow.
- In the merge area, enter the flow of traffic, checking mirrors and blind spots.
- Turn off the turn signal and begin looking ahead to anticipate problems or upcoming lane changes.
- Do not completely stop in the entrance area unless absolutely necessary.

Lesson four – exiting

Teach the steps for exiting a highway:

- Identify the exit well ahead of time.
- Scan traffic for problems when approaching the exit, but don't slow down on the highway.
- Start to signal four to six seconds before reaching the ramp.
- Upon entering the ramp, tap the brakes and begin rapidly reducing speed.
- Slow down to the posted exit ramp speed limit before reaching the curve.

There is plenty of time to merge. If a gap doesn't present itself immediately, adjust your speed in order to find one.

Highway driving – part two

Goal: Teach your teen to maneuver safely in complex highway driving environments at higher speeds.

Location: Start on a multi-lane highway with easily-accessible exits, at a time when traffic is light, such as a weekend morning. Move on to practice at heavier traffic times when your teen is ready.

Lesson one - steering technique

Once on the highway, coach your teen on steering technique. At fast highway speeds, excessive steering can be dangerous and lead to loss of control. Remind your teen to steer gently on highways.

Lesson two - lane changing

In the high-speed, complex highway environment, lane-changing skills are very important. Have your teen spend several miles practicing the lane-changing and passing skills previously learned in "Skill nine: multi-lane roads," until they are comfortable performing them at highway speeds. Remind your teen to:

- Watch for merging vehicles and move one lane left to make space for them when needed.
- Change lanes one at a time only.
- Watch mirrors for tailgaters and move to another lane to let them pass.

line of sight path of travel

For the first several lane changes you may need to talk your teen through the decision-making process. Double-check all mirrors to make sure that the lane is clear.

Higher order

Early in the training process, parental instruction tends to focus on vehicle handling. As your teen's skills improve, try to focus on "higher order" instruction, such as scanning ahead, hazard detection, and anticipating the other driver's behavior.

Lesson three – three-second rule

Review the three-second rule for following distance, learned in "Skill six: looking ahead." Additionally, coach your teen to use a three-second rule for these highway driving circumstances:

- Merging onto a highway
- Changing lanes
- Exiting a highway

Lesson four - challenging road conditions

Coach your teen to adjust travel speed and vehicle position based on weather and road conditions. Once your teen is comfortable with and proficient at highway driving in good conditions, spend some practice time on highways under more challenging conditions, such as rain. Coach them to always use appropriate caution, as conditions can change quickly.

Lesson five - road trips

Consider planning some short day trips with your teen to a destination two to three hours away. Have them drive there and back. Find an event or place that you will both enjoy and have fun.

Skill completed

driver initials

Roundabouts

Goal: Teach your teen how to enter and drive roundabouts safely.

Location: A road that leads to a one-lane roundabout. Move on to practice at two or more lane roundabouts when your teen is ready.

Roundabouts are circular intersections designed to calm traffic, increase safety, reduce stop-and-go travel, and decrease traffic delays. They were introduced into Colorado in the early 90's in Colorado Springs (see https://www.codot.gov/projects/i70edwardsinterchange/i-70-edwards-interchange-phase-i/area-roundabout-history.html). Since then, roundabouts have proven to be an efficient means to move traffic through congested intersections and have shown to reduce accidents by half (all but eliminating the more severe broadside and head-on collisions). Roundabouts also offer a safe environment for pedestrians, who only have to navigate one-way traffic flow.

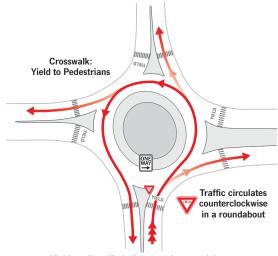

Driving in a roundabout can be intimidating, but it's really quite simple when you know how it works.

Lesson one – five easy steps

- **Slow down:** Speeds of 15 mph or less are adequate in the roundabout.
- Yield: Vehicles must yield to the left before entering a roundabout.
- Entering: Never stop once inside the roundabout. The vehicle in the roundabout has the right of way.
- **Destination signs:** Look for destination signs and exit in that direction.
- Exiting: Look to your right, check your mirror and use your turn signal

Lesson two – yield to emergency vehicles

- If you have not entered the roundabout, pull over and allow emergency vehicles to pass.
- If you have entered the roundabout, continue to your exit, then pull over and allow emergency vehicles to pass.
- Avoid stopping in the roundabout.

Yield to all traffic before entering roundabout

This example shows the traffic movement patterns through a one-lane roundabout. The one-lane roundabout is known as one of the safest and most efficient intersections.

Lesson three – two or more lane roundabouts

- · As you approach, observe the signs and arrows to determine which lane to use before entering.
- Black and white signs on the side of the road and white arrows on the road will show the correct lane to use.
- If you want to make a left turn, stay in the left lane or other lanes that are signed and marked as a left turn.
- To make a right turn, stay in the right lane or other lanes that are signed and marked as a right turn lane.
- If you want to go straight, observe the signs and arrows to see what lane is correct.

Skill completed

#RoadReadv

Driving on rural roads

Goal: Teach your teen to drive safely and with confidence on two-lane rural roads.

Location: A two-lane rural road.

Lesson one - gravel roads

Gravel roads present their own special road safety challenge. The issue is traction. Driving on loose gravel is harder than driving on pavement because your tires don't have the traction needed to give you stable control. Slow down, avoid sudden turning, accelerate and brake slowly, and increase your following distance to six seconds. Be particularly aware of gravel "windrows," piles of gravel near the road edge, used for highway maintenance.

Lesson two - driving hazards

Large/slow vehicles: Slower trucks, farm vehicles, and road maintenance equipment are likely to make wide turns at unmarked entrances. Use caution and make sure the driver can see your vehicle before passing.

Sharp drop-offs and gravel shoulders: One of the most common driving hazards is running off the road. The urge to overcorrect is strong and often results in a serious crash. If you run off the road, follow these steps to ease your vehicle back onto the road:

- Do not turn the wheel; continue driving straight.
- Take your foot off the accelerator.
- Find a safe place to reenter the road.
- Turn on your turn signal and reenter the road when it is clear.
- Do not apply brakes until regaining control of the vehicle.

Restricted visibility: Trees, cornfields, buildings, and hills can block a driver's view of oncoming traffic, or traffic entering from the side. Identify blind spots to better anticipate and be prepared for potential dangers.

Uncontrolled intersections: They are not controlled by yield or stop signs. Use caution, slow down, and be prepared to stop for oncoming traffic. The vehicle on the left should yield.

Animals: If unable to stop for an animal crossing the road, do NOT swerve – swerving makes it hard to keep control. The most serious crashes happen when drivers swerve into oncoming traffic or roll into a ditch.

If you see an animal, slow down and be prepared to stop. Always be on the lookout, especially at sunrise and sunset. October and November are peak months for deer crashes. Deer travel in groups; if you see one, look for more.

Hills and curves: These are often steeper and sharper on rural roads than on interstate highways. Before reaching the crest of a hill, or entering a curve, slow down, move to the right side, and watch for traffic.

Railroad crossings: Always slow down, look both ways, and be prepared to stop. On rural roads, many railroad crossings are marked only with a round yellow 'railroad crossing ahead' warning sign and a white X-shaped railroad crossing. There may not be flashing lights, warning bells, crossing gates, or pavement markings.

Gravel slide

Be ready for skids.
A vehicle can become difficult to handle in heavy gravel. If the vehicle starts to skid, release the accelerator or brakes. As you release them, look where you want to go, and steer in this direction.

Skill completed

supervisor initials

driver initials

Practice in other conditions

For new drivers, it can be challenging to drive in new and unfamiliar conditions. It's best that you provide guidance before they experience these conditions on their own.

Night driving

A driver's reaction depends on their vision, which is limited at night. Some tips to keep in mind:

- Glare from oncoming headlights makes it difficult to see. To avoid being temporarily blinded, you should look ahead toward the right side of the road.
- Headlights should be turned on before the sun goes down to make the car more visible.
- High beams should only be used when other drivers won't see them, such as on isolated roadways with little traffic.
- To compensate for reduced visibility, drive more slowly and at a greater following distance.

Wet/slippery roads

To reduce risk on wet and slippery roads, coach your teen to practice the following:

- Turn on the wipers as soon as the windshield becomes wet.
- Turn on the low-beam headlights; this helps others see you.
- Drive 5–10 mph slower than normal and increase your following distance to five or six seconds.
- Be more cautious, and slow down on curves and when approaching intersections.
- Turn the defroster on to keep windows from fogging over.

Hydroplaning

Hydroplaning occurs as a result of water on the road that is deeper than the tire tread. This layer of water reduces friction with the tires and can result in the loss of control. If you can see deep water on the road, reflections on the pavement, or the car ahead leaves no tracks on the water, these are indications your car could hydroplane. Slow down.

Fog

Use low-beam lights or fog lights if your vehicle has them. Don't use high-beams – they reflect off the fog, causing glare and reduced visibility. Slow down until your speed matches your ability to see, even if it means slowing to a crawl.

Snow

Make sure your vehicle is clear of snow and ice before driving. Driving can cause snow/ice to slide and block your view, or fly off and strike other vehicles. Other tips to keep in mind:

- When starting to drive in snow, keep the wheels straight ahead and accelerate gently to avoid spinning the tires.
- Decrease your speed to make up for a loss of traction. Accelerate and decelerate gently, and be extra careful when braking.
- Stopping distances can be 10 times greater in ice and snow. Begin the slowing-down process long before anticipating a stop at an intersection or turn. Brake only when traveling in a straight line.
- Look ahead for danger spots, such as shaded areas and bridge surfaces that may be icy when the rest of the road is clear.
- When driving uphill, stay far behind the vehicle ahead so you will not need to come to a sudden stop, which can cause skidding. For traction laws check out https://www.codot.gov/travel/winter-driving/TractionLaw.

Prepare ahead of time

Talk to your teen about travel resources to help them know the conditions they might face before heading out on the road. Colorado drivers can visit www.COTrip.org or call 5-1-1 to get the latest road conditions or to learn about road construction or closures.

Adapting to new landscapes

Mountain driving

Some hazards you should be aware of are steep hills, changing weather, wildlife, and rocks in the roadway. If your vehicle experiences difficulty traveling up steep roadways, pull off the road at the first place you may do so safely, or stay in the right lane to allow other vehicles to pass. Here are some added tips:

- Pay special attention to speed limit signs and warning signs, such as those warning of curves, steep hills, or other hazards.
- Watch for bicyclists near the right edge of the road.
- Use lower gear to control speeds while going up or down long, steep hills.
- You must yield to vehicles going uphill if you are traveling downhill on a narrow road.
- Do not coast downhill by shifting into neutral or disengaging the clutch.

The higher the altitude, the less oxygen there is in the air. Some people may react to the decrease in oxygen. They may develop mild symptoms, such as headache, nausea, and fatigue. Remember, insufficient hydration can lead to the onset of symptoms of altitude sickness. Even if they are mild, they can affect your alertness as a driver.

Rural driving

When driving in rural or country areas, there are a number of special situations that require attention. Watch for driveways, farm equipment, railroad crossings that might not be marked, and bridges that are narrow and poorly surfaced. Some intersections may be hidden by trees, brush, and crops. Animals often are found wandering along the roadway. Extra care and slower speeds should be used when driving on gravel roads because of the reduced traction due to the road surface. The road surface can be affected by loose gravel, slippery conditions after rain or snow, ruts in the driving lanes, and washboard conditions. When approaching oncoming vehicles, watch for soft shoulders or the absence of shoulders.

Safety around snowplows

Colorado Department of Transportation (CDOT) snowplows use distinctive amber and blue lights to warn you that snow removal operations are underway. When you see these lights, slow down and use caution.

- Give snowplows room to work: The plows are wide and can cross the center line or shoulder.
- Do not tailgate and avoid passing, especially on the right: If you must pass, be extremely cautious and beware of the snow cloud.
- Keep your distance and watch for sudden stops and turns: A snowplow operator's field of vision is restricted. You may see them, but they don't always see you.

Note: Four-wheel drive (4WD) vehicles do not stop faster on ice and snow than two-wheel drive (2WD) vehicles. The heavier the vehicle, the longer it takes to stop, no matter how many drive wheels.

Express Lanes

Express Lanes increase road capacity and help manage congestion on the highways, eliminating the need to continue to build more lanes. Express Lanes work to move more people, rather than move more cars. By presenting choices, Express Lanes will reduce delays, manage congestion and keep travel times reliable for motorists.

Anyone can use Express Lanes, there are simply different ways to travel them. A traveler can choose to travel:

- For free with a motorcycle and as a carpooler with one or two passengers, all HOV Express Lanes require two passengers along with the driver. You will still need to set up an Express Toll account and get a pass but you won't be charged a toll for using the Express Lane.
- By transit on either priority buses or Bus Rapid Transit
- By paying a toll as a solo driver.

For more information link to CDOT https://www.codot.gov/programs/expresslanes/assets-documents/cdotexpresslanesfactsheetv4.pdf.

Overconfidence

After becoming proficient in basic driving skills, teens can become overconfident and begin to drive faster, follow other cars more closely, brake abruptly, etc.
Gently and continuously remind your teen to stay three seconds back from other vehicles and always drive with caution.

Sharing the road

Sharing the road means being a courteous, alert and knowledgeable driver, making the roads safer for all. Bicycles, motorcycles, buses, trucks and pedestrians all deserve a share of the road.

Motorcycles

Motorists must be on the lookout for motorcycles and anticipate sudden and unexpected moves from them. Motorcycles are entitled to the same full lane width as other vehicles.

Motorcycles are smaller, harder to see and can accelerate and brake faster than other vehicles. Their control is more easily affected by road defects and debris.

Because motorcycle operators are more vulnerable in collisions, drivers should watch for them using extra caution and allow increased following distance when driving around them.

Motorcycles may appear in your field of vision or blind spots suddenly, so please "look twice for motorcycles."

Trucks

If you cut in front of another vehicle, you may create an emergency-braking situation for the vehicles around you, especially in heavy traffic. Trucks and buses take much longer to stop in comparison to cars. When passing, look for the front of the truck in your rearview mirror before pulling in front, and avoid braking situations.

Large trucks have blind spots, or "no-zones", around the front, back, and sides of the vehicle. These No-Zones make it difficult for the driver to see. Avoid being caught in a truck's no-zone. If you can't see the truck driver in the truck's mirror, the truck driver can't see you.

Be careful of trucks making wide right turns. If you try to get in between the truck and the curb, you'll be caught in a "squeeze" crash. Truck drivers sometimes need to swing wide to the left in order to safely negotiate a right turn. They can't see cars directly behind or beside them. Cutting in between the truck and the curb increases the possibility of a crash. So pay attention to truck signals, and give them lots of room to maneuver.

Work zones

Work zones can be very dangerous, especially when traveling on the highway. It's important to be alert and prepared to slow down or stop in a work zone. Slowing down and allowing others to merge will ensure a safe passage through work zones. Here are a few tips on work zone safety:

- **Stay alert:** Work zones are busy places where construction vehicles and workers are always moving. Be alert, and stay on the safe path that is designated throughout the work zone.
- Take your cues from trucks: Work zones often pop up suddenly. If you are not paying attention to the signs, you could find yourself in a serious accident. Since trucks have a height advantage and can see ahead of traffic, their brake light activity can provide a good signal of a slow-down or work zone ahead.
- Merge gently: Aggressive drivers can be extremely dangerous while driving in work zones. Work zones require time and courtesy. For a smooth passage through work zones, allow others to merge in front of you. Be especially considerate to trucks. They require more space to merge and are the least maneuverable vehicles on the road.

Source: U.S. Department of Transportation, Federal Motor Carrier Safety Administration

Safety around motorcycles

Keep coaching your teen that constant awareness and looking ahead are the keys to learning to drive safely. When riding behind a motorcycle, increase your following distance – motorcycles have a shorter stopping distance, and riders are less protected in collisions.

Work zones

Expect the unexpected. Follow the posted speed limit and pay attention. Leave extra space between you and the vehicle in front of you,and keep a safe distance between you and workers on or near the roadway.

Sharing the road with bicyclists and pedestrians

- Scan the street for wheels and feet: Be especially careful to look for people walking and biking before turning at intersections and driveways.
- Yield to pedestrians: Pay attention to the pedestrian signal and give people walking the right-of-way.
- **Double threat:** Never pass another vehicle that has stopped or is slowing down for a pedestrian. Remember, you might not be able to see the pedestrian when you approach a stopped vehicle so be aware.
- Watch for bikes: People riding bicycles have the right to be on the road (and are often prohibited from riding on sidewalks), so respect their right to be there.
- Passing safely: Stay at least 4 feet away from bicyclists (and other vulnerable road users, such as garbage collectors, police officers, and tow truck operators) when passing, and don't return to the right until well clear of the person. If there isn't enough room to safely pass in the same lane, you must use another lane or wait for a safe opportunity to pass. Do not pass a person on a bike and then immediately turn right.
- Avoid the "right hook": Look for and yield to people biking on the right when turning right.
- Avoid the "left cross": Look for and yield to people walking across the street and yield to oncoming people on bikes when turning left.
- Visibility: Look for bicyclists at night and watch for their reflectors or lights.
- Check blind spots: Watch for bicyclists coming from behind, especially before turning right.
- Doors are dangerous: Before opening your car door or moving, look in your mirror and physically turn your body to make sure no bicyclists are coming. Learn more here: https://www.dutchreach.org/dutch-reach-practice-tips-door-latch-reminders/

Lowering speeds can save lives

Source: Impact Speed and a Pedestrian's Risk of Severe Injury or Death. Brian Tefft, AAA Foundation for Traffic Safety, 2011

Respect for all road users

Put yourself in the shoes of a person walking or biking. We are all trying to safely get to our destination.

Respect and kindness towards other road users can go a long way.

Continuing education

Learning doesn't stop when your teen has received their license. It's important to continue teaching and building upon the skills they have learned. As you continue the supervision process, think about these three areas of focus:

- Spend as much time as possible driving with your teen.
- Drive in a wide variety of conditions (weather, time of day, different traffic volumes, etc.).
- Focus on "higher level" learning: scanning ahead, recognizing hazards, and learning to anticipate the behavior of other drivers.

Now that your teen has become proficient in the basic operational skills of driving, it is essential that you ensure they be exposed to a wide variety of driving circumstances and conditions. Make a point of finding circumstances to drive with them that they have not yet experienced, and do it for all types of roads – quiet neighborhood streets, multi-lane roads, and highways. Drive with them at different times of the day, in poor weather, and with varying levels of traffic. It's much better that they experience these conditions with you, rather than alone or with other teens.

Much of what has been discussed to this point has related specifically to the basic skills your teen will need to be a safe driver. Now, your goal is to ensure your teen is thinking intelligently and making the right decisions as a driver. Sometimes after teens become proficient with the basic skills, parents/guardians will often "step back," becoming less involved in their teen's supervision. But there's still a lot to learn; their teen's education is not complete.

Be clear with your teen that the training process is ongoing and that you will continue to provide input into their development so that you both stay in the learning/teaching mode.

Even the best new drivers are likely to make mistakes. These mistakes are great teachable moments for "higher order" instructions. So instead of saying, "Stop sooner," advise your teen to try to focus on looking ahead and anticipating events, with an emphasis on good judgment, good decision making, and hazard perception. The shift from a basic comment to a more advanced focus is perhaps the most essential element of educating your teen at this point in the learning process.

As your teen drives, talk to them about specific hazard areas, possible areas of conflict, and blind spots where trouble may hide. Teens tend not to be as good at anticipating these trouble areas as experienced drivers. A good exercise is to have your teen describe the blind spots and possible areas of conflicts they see. It will let you know that they are thinking, anticipating, and driving intelligently.

Keep on coachin'

Even after your teen is licensed, use your time driving with them to instill habits of good judgment, accurate hazard anticipation, and smart decision-making.

Prevent and manage vehicle breakdowns

The most common reasons for breakdowns relate to failed tires, running out of gas, engine overheating, and batteries.

Prevent tire-related breakdowns: Taking good care of tires can prevent crashes, as well as breakdowns.

- Have tires inspected, rotated, and balanced by professionals every 5,000 miles.
- Check tires' air pressure every month, and before long trips. Best to check when tires are cold. Use a tire
 pressure gauge, and find the recommended psi on the driver's side door jam or in the owner's manual
 (not from pressure shown on the tire sidewall).

Manage tire-related breakdowns: First thing to consider is safety. Find a safe location to stop; it's okay to drive slowly on a flat tire's rim for a short distance to a wide shoulder, rest stop, gas station, or parking lot.

Activate hazard lights.

Consult the vehicle operator's manual to change the tire, or call roadside assistance.

- Have a fully inflated spare tire in your car. Donut spares should be inflated to 60 psi.
- Practice (before the flat tire happens) using your car's tools to change a tire. Identify tool shortages and acquire what is missing.

Prevent running out of gas: Fill the tank when the gauge says ¼ full. In winter, or in a rural area, keep the tank at least ½ full. Don't wait until the fuel light comes on. You could get stranded or stuck in traffic.

Manage running out of gas:

• Stow an empty 1-gallon gas can so you can carry it to the nearest gas station. Never stow a container with gas in the car. Adding gas works best when the car is on level ground.

Prevent battery problems: Car batteries usually last 3 to 5 years. Hotter climates will shorten a battery's life.

- At first sign of weakness, have the battery checked, and replaced if weak.
- Look for: Illuminated battery light, slow engine crank, and dimming lights.
- Keep clamps to battery terminals tight so they cannot be moved by hand.

Manage battery problems: If the car doesn't start, most likely its battery is dead or its clamps are loose.

Stow 20 ft. long jumper cables. Know how to use them correctly with another car's alternator.

- Stow a portable jumper battery. Charge it monthly and after each use.
- Have a correctly-sized combination wrench to tighten loose battery clamps.

Prevent engine overheating: Common causes include low coolant in the radiator – usually due to a leak; hot weather; and malfunctioning radiator cooling fan.

- Pay attention to signs, including temperature gauge's reading over halfway from cold to hot, steam or
 water vapor coming out from the hood, or a sweet smell coming from the engine. Proceed right away to
 a mechanic!
- Check engine coolant regularly. It should be above the 'Minimal' or 'Fill' line when the engine is cool, and at or just below the 'Max' line when the engine is hot. Stow a gallon of water for an emergency.

Manage engine overheating: If you encounter any of these signs:

- Get to a safe location as soon as possible and turn off the engine.
- Allow engine cool down for at least 30 minutes before opening the hood. DO NOT open the radiator cap while the engine is hot because the system is highly pressurized.
- · Add water if coolant is low. Adding water, without antifreeze, usually can get you from roadside to a repair shop.
- Before proceeding to a mechanic, turn off the air conditioner and turn on the heater.

Correct air pressure

Correct air pressure in tires helps prevent blowouts. Check spare tire PSI too (they're usually low).

AT THIS MOMENT ALL OF YOUR DREAMS ARE WITHIN YOUR REACH

NATIONALGUARD.com

Now, they're in the driver's seat.

From mirrors and blind spots to seatbelts and speed, new drivers have a lot to think about. As a parent, you have their safety to think about. One of the best things you can do is set a good example when you're behind the wheel.

State Farm® wants to help you keep them safe too. Find interactive safety programs, tips and more at **teendriving.statefarm.com**. Just one more way we're *here to help life go right*.®
